

Preventing corrosion, erosion and abrasion to enable your plant to perform better and last longer.

We can specify and provide both hot and cold applied rubber lining, including rubber backed ceramic tiling, to provide suitable protection for your plant.

Our workshops are set up to handle all sizes of plant components in ideal conditions for consistently dependable results. If getting your plant items to our factory is not an option, we'll send out a team of highly qualified rubber liners with all the product and equipment required to deliver a first class result.

Rubber lining applications include:

- Chutes
- Floatation cells
- Hoppers
- Hydro cyclones
- Launderers
- Mills
- Piping
- Pulleys
- Pump sumps
- Storage bins
- Tanks
- Valve bodies
- Water boxes
