Features

- Fit for purpose
- High cover strength
- Low elongation
- Low abrasion loss
- High impact, wear and cut & gouge resistance
- Exceeds Australian Standards AS1332

Economical

- A cost effective alternative to our premium range of belt
- Manufactured in long runs to achieve economies of scale
- Lower your costs per tonne

Ready to Install

- Stock available at our national network of service centres
- Splicing service - hot or cold
- After hours service

Assured Quality

- Superior materials
- Fenner Dunlop manufacturing expertise
- Meticulous commitment to testing and quality control

Peace of Mind

- Backed by Fenner Dunlop warranty and reputation
- Supported by our team of engineers and trained conveyor experts
- Reliable after sales service

AVAILABLE IN A RANGE OF SPECIFICATIONS

3ply PN450 - 5+2 - N or M

4ply PN600 - 6+2 - N or M

4ply PN800 - 10+3 - M

Other specifications and lengths available on request.

AS Grade	TECHNICAL SPECIFICATIONS					
	Australian Standards AS1332			Duracon® - typical values		
	cover strength (mpa)	cover elongation (%)	abrasion loss (mm ³)	cover strength (mpa)	cover elongation (%)	abrasion loss (mm ³)
